

Darts & Pats Phase 1 Kiosk Handoff

Touchscreen compatibility report with screenshots and next-step recommendations

Repo	github.com/heggkj/darts-pats
Branch	phase-1-corridor-experience
Commit	c7494b0 Add kiosk touchscreen support
Generated	May 9, 2026

My Response

Done. I added the kiosk/touchscreen pass and pushed it to **phase-1-corridor-experience**.

Commit: **c7494b0 Add kiosk touchscreen support**

Branch: **phase-1-corridor-experience**

What changed: added the welcome threshold entry, Start over, Presentation Mode, walk buttons, swipe/drag corridor pan, idle reset, touch/click related chips, touch-friendly drawer controls, coarse-pointer CSS, and larger tap affordances while preserving the 2.5D archival corridor tone.

Verified: **npm run build** passed, **git diff --check** passed, and browser smoke checks passed for enter, walk left/right, card tap, drawer previous/next, related-entry chips, close, presentation toggle, and Start over with no console warnings/errors.

Thoughts About Next Steps

- Run a real-device rehearsal on the intended 16:9 touchscreen, including a standing-distance read test, repeated tapping, and one-handed operation from both left and right sides of the screen.
- Tune the corridor length after seeing the physical screen: the current horizontal pan feels exhibit-like on a wide display, but the amount of sideways travel may need adjustment for the actual kiosk glass.

- Add an About / Credits panel before public launch so source context, archival limits, and no-login/no-tracking expectations are clear without sending visitors away from the exhibit.
- Consider a quiet operator shortcut for diagnostics, such as a hidden build/version panel, while keeping public mode free of external links, accounts, forms, saved state, or scorekeeping.
- Do one accessibility pass with keyboard only, reduced motion enabled, and high ambient-light conditions; the focus states and drawer are in place, but public installs always reveal contrast and glare surprises.
- If the exhibit is deployed to Netlify for kiosk use, configure the browser/OS kiosk shell separately and keep the web app as the touch-first, full-screen-friendly layer rather than depending only on the Fullscreen API.

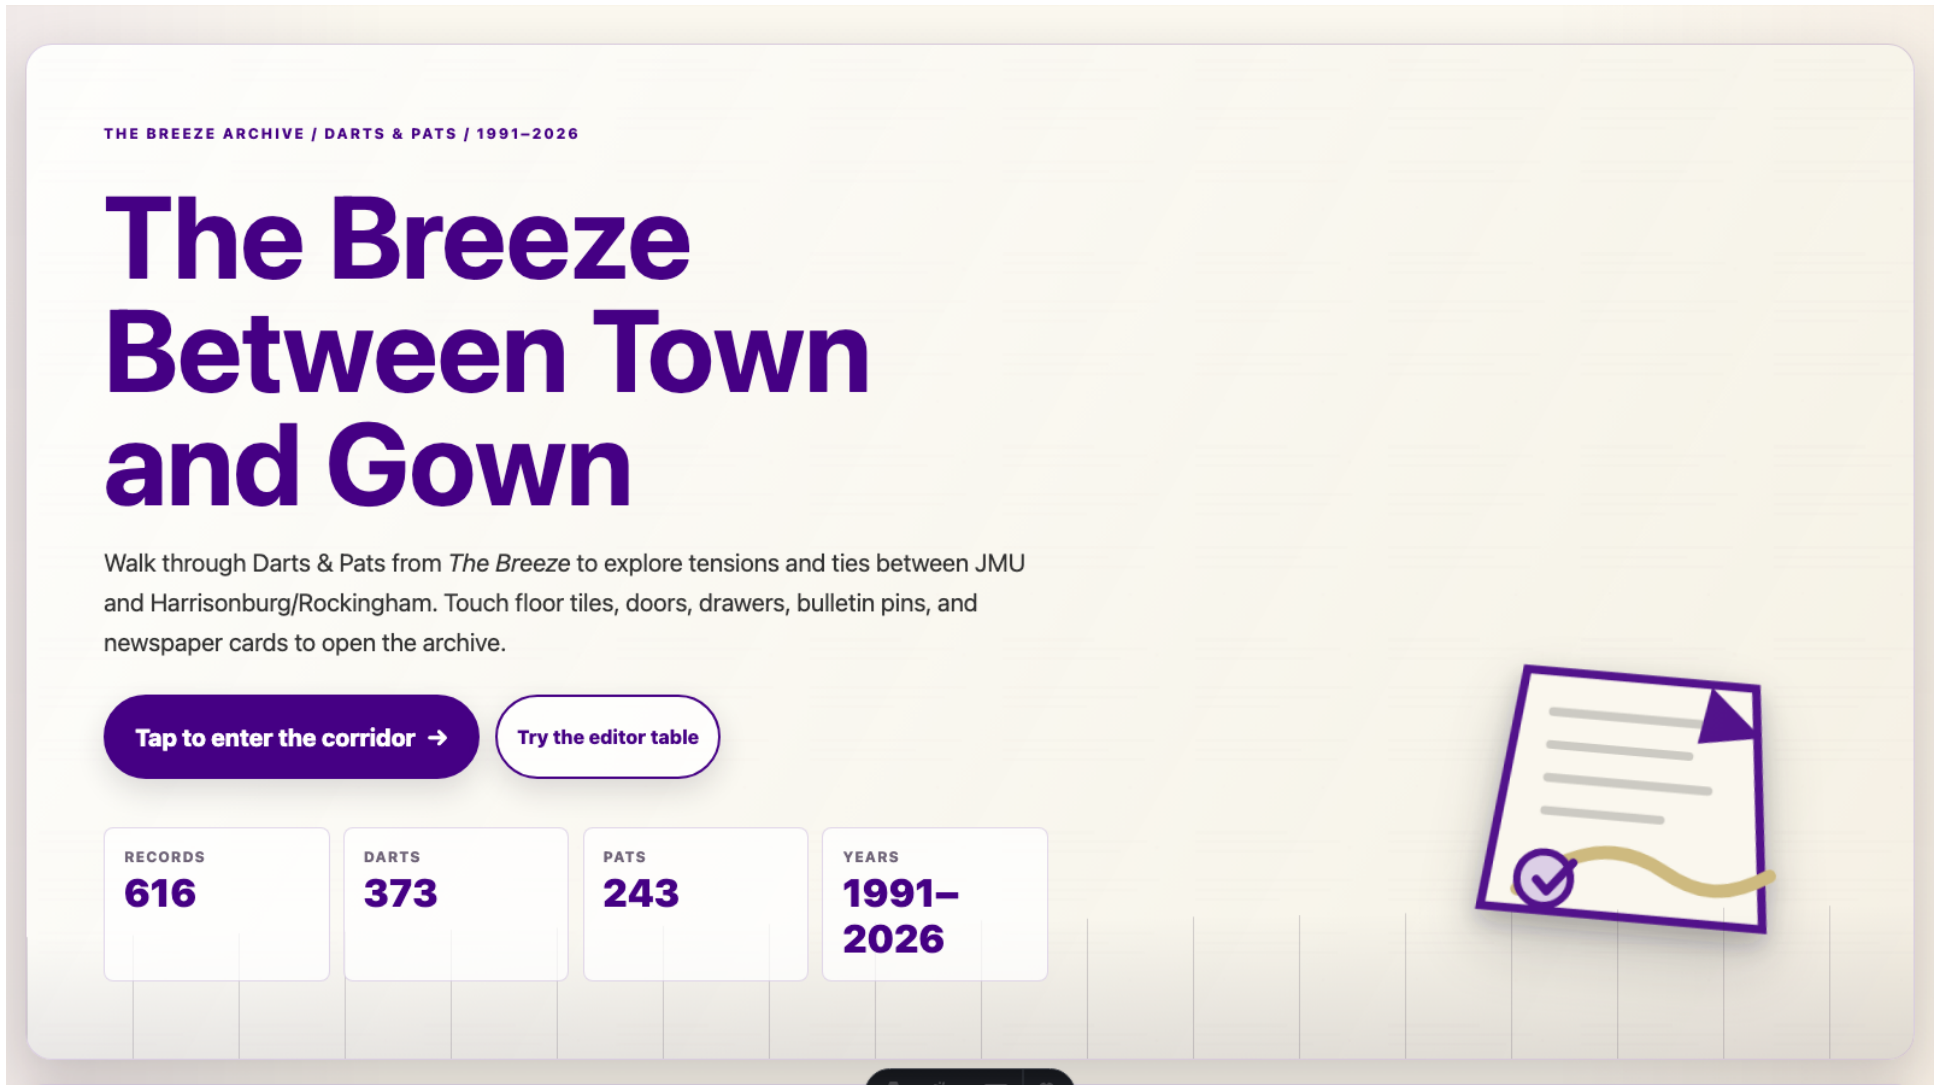

Screenshot Index

These screenshots focus on the visible kiosk/touch changes: threshold entry, corridor walking, touch drawer, related chips, editor table, and idle reset.

Screen	What it documents
Welcome / threshold screen	Large Tap to enter the corridor opening screen with the one-sentence exhibit framing for public visitors.
Corridor walk controls	Large left/right walk buttons and horizontal pan area make the corridor navigable without hover or tiny scrollbars.
Horizontal corridor movement	The hallway supports side-to-side walking while preserving Darts wall, Pats wall, topic stations, and timeline floor.
Touch reading drawer	A full-width drawer with large close, Previous, and Next controls plus readable metadata and full text.
Related-entry chips	Related items are now large tappable archival chips, not hover-only compact cards.
You Be the Breeze Editor	The no-score editor interaction remains touch-friendly, public, and unsaved.
Idle reset overlay	The reset warning returns the exhibit to the threshold after inactivity while avoiding a tiny modal trap.

Welcome / threshold screen

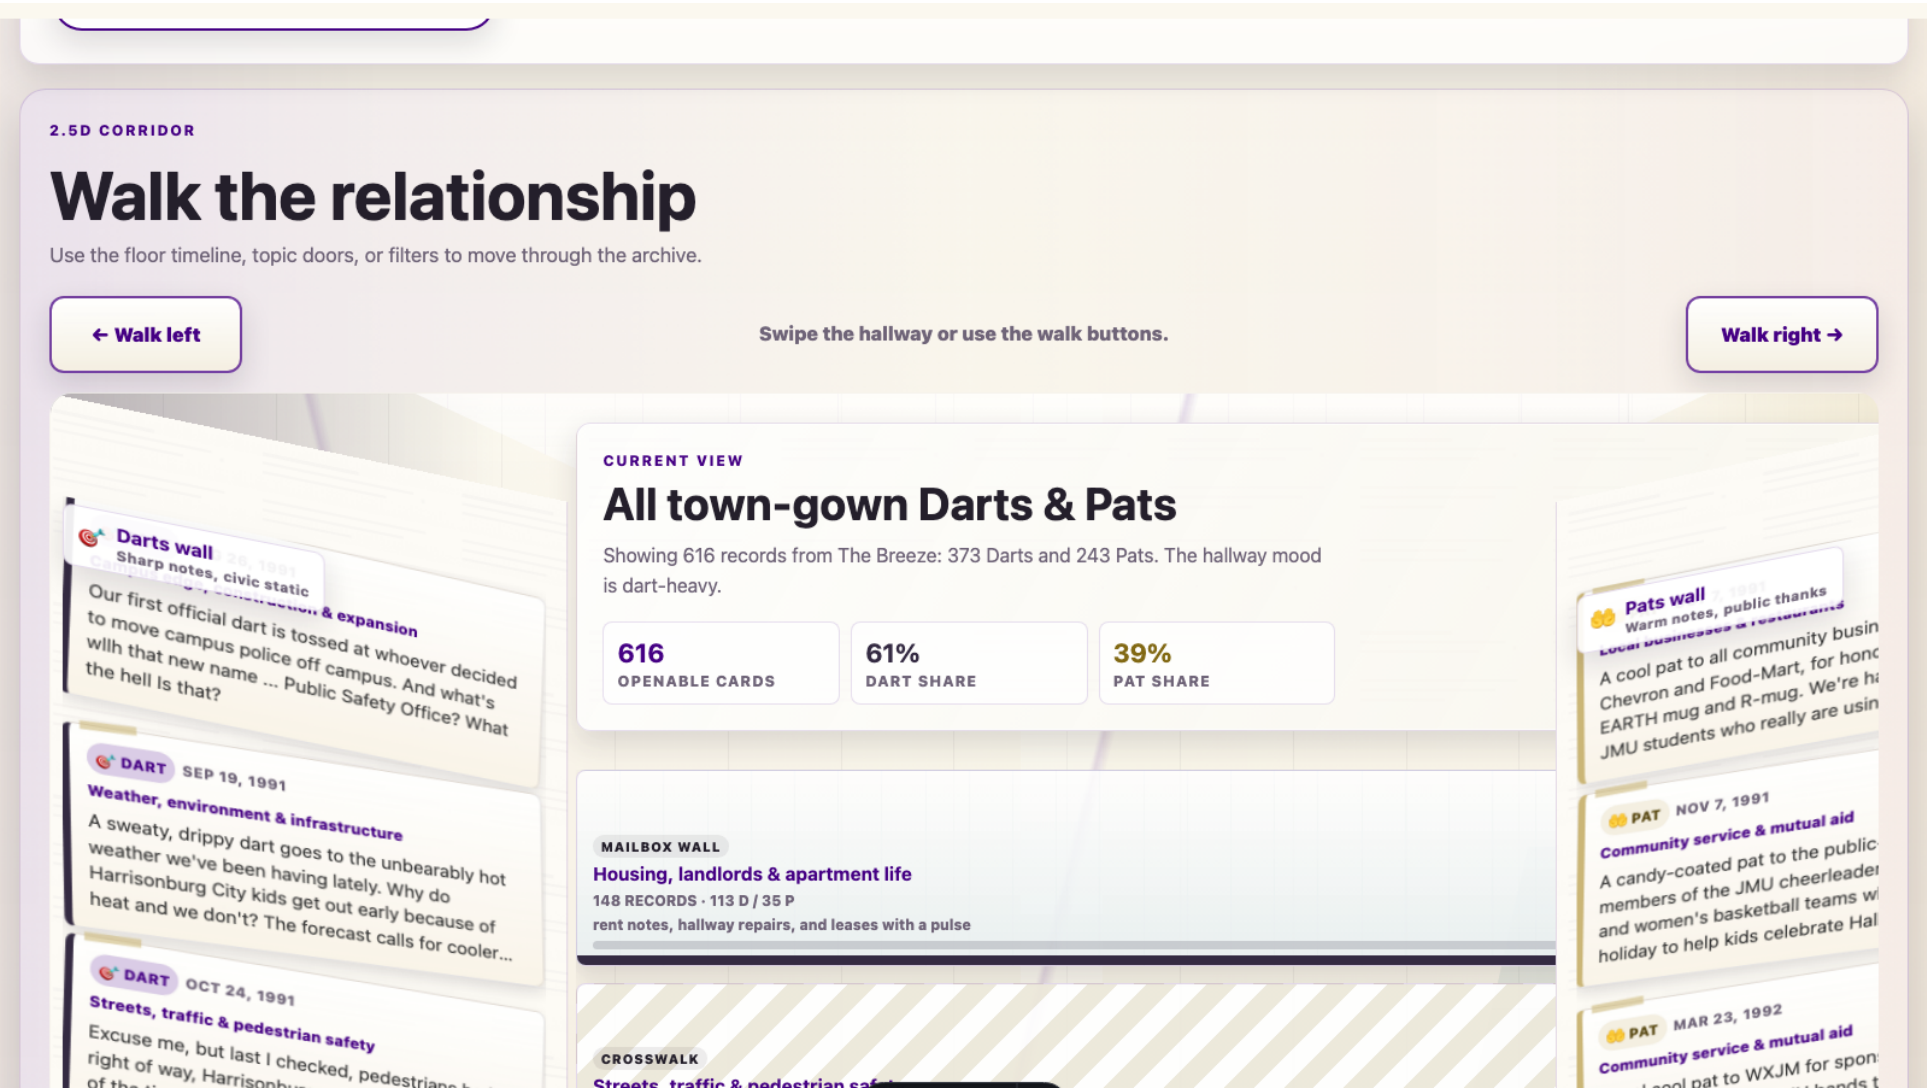

Large Tap to enter the corridor opening screen with the one-sentence exhibit framing for public visitors.

Campus edge, construction & expansion

To whoever decided to finally put a mailbox on campus near the Godwin bus stop. Now all we need is a mailbox near Anthony-Seeger Hall so we don't have to play Frogger across Main Street to mail our tuition checks.

NO-SCORE INTERPRETIVE GAME

You be the Breeze editor

Read a hidden card, guess whether it was a Dart or Pat, then reveal how it appeared and where it fits in the exhibit.

This may be a crazy thought, but are the Main Street crossing guards really meeting their long-term goals? Not only does their schedule seem pretty inconsistent, they aren't doing anything we couldn't do by sticking our hands out. And they don't even get to wear safety orange.
