

Phase 10b Attractor and Cleanup Polish

This cleanup pass keeps the exhibit structure intact while refining the attractor and Memory Corridor for public touchscreen use.

What changed

- **Birds and wire:** birds moved down to the lower visible wire, with the line strengthened so it reads as an intentional power line rather than an accidental artifact.
- **Balloon activity:** six more ambient balloons were added. The ambient balloons rise from crowd/market/parade areas on staggered loops, while a single active balloon still handles the card-changing pop cycle.
- **Public text cleanup:** public cards, excerpts, drawers, string-board nodes, Long Argument cards, and attractor clippings share cleanup for bracket artifacts. The Editor's pre-reveal text now neutralizes self-naming form words as note/notes; after reveal, it shows the archive text.
- **Class-of clear:** the active Class-of chip now has a large x control with a screen-reader label. It clears the class window, closes the tray, refreshes Word Breeze/corridor stats/cards, and restores all years.

Verification

Build:
`npm run build` passed

Whitespace:
`git diff --check` passed

Artifact grep:
No bracket/form-hidden matches found

Browser smoke:
Passed: touch-to-enter, 4 birds, 12 balloons, Editor cleanup, Class-of clear

Reduced-motion mode freezes balloon and bird animation into a static atmospheric state. No public UI text in the smoke check contained the bracket artifact.

Birds on corrected lower wire

Birds perch on a lower, more intentional power line.

Screenshot Set

Birds on corrected lower wire

Birds perch on a lower, more intentional power line.

Several balloons visible/rising

Ambient balloons are staggered across the parade sky while the screen stays calm.

02-several-ambient-balloons-rising.png

Popped card without bracket artifact

Attractor clipping text is checked for public cleanup.

04-popped-card-no-form-hidden.png

Editor hidden card without bracket artifact

Pre-reveal masking uses neutral note/notes wording rather than a visible placeholder.
