

Phase 7 Touch Friction Polish

Darts & Pats museum touchscreen exhibit

What changed

- Removed the Editor topic chooser so the public game is now one tactile choice: Dart or Pat.
- Kept Editor masking, but restored the original unmasked archive text after reveal.
- Compressed the reading drawer metadata into a compact archive-details strip and moved topic tags into readable pills.
- Moved Related by Topic higher so visitors can see related cards without digging through source metadata.
- Clarified the Class-of tray with graduation-year copy and exact calculated year ranges before applying the filter.
- Removed public search/dropdown controls that could make the exhibit feel like a website form.

Editor Table

The Editor's Table now asks visitors to read one masked card cold and choose only Dart or Pat. The removed topic chooser was the most form-like part of the game and slowed down what should feel like a quick interpretive moment. The reveal copy avoids score language: no points, no leaderboard, no right/wrong framing.

Playable pool after masking: **614 records**. Withheld because the masked card becomes too short, too redacted, or otherwise confusing: **2 records**. All records remain in the full archive, corridor, drawer, and Follow the Strings room.

Reading Drawer

The public drawer now opens with classification/date, a large topic/title, full text, compact source details, tag/entity pills, and then related cards. Technical source fragments such as PDF filenames, PDF page numbers, Breeze page numbers, repeated dates, and "Not parsed" fields were removed from the public reading surface.

The public source line is now intentionally plain: "The Breeze · Record #ID." Raw PDF/page details can remain useful for staff or developer diagnostics, but they should not dominate the visitor reading experience.

Class-of Tray

The Class-of tray now says “Pick your graduation year” and calculates the exact years before applying the filter. Example: Class of 2004 applies 2001-2004. Outside taps and scrolling close the tray without applying anything, while Start Over and idle reset clear the active window.

Touch Control Audit

Finding	Status	Keyboard risk
Editor topic select	Removed	None
Threshold year/era/topic/form dropdowns	Removed	None
Threshold search box	Removed	None
Class-of range slider	Kept as large tactile slider	No text keyboard
Textarea/contenteditable/prompt()	None found in public UI	None

Audit conclusion: the visible public exhibit no longer exposes text/search fields, visible select dropdowns, textarea fields, contenteditable areas, or prompt() flows. The only remaining public input is the Class-of range slider, which does not summon a touchscreen keyboard.

Remaining Risks

- The Class-of slider is acceptable for kiosk use, but a future physical year-wheel or ticket chips could feel more tactile.
- The drawer is much calmer, but long records may still require scrolling on smaller portrait screens.
- The Editor pool is broad now; a human review pass could further flag cards that are technically playable but culturally/contextually too opaque for a passive public game.

REFLECTION WALL

What the wall remembers

All entries are drawn from Darts & Pats published in *The Breeze*, James Madison University's student newspaper. They are presented as historical evidence of perception, humor, grievance, gratitude, and civic memory—not as neutral measurements of the town-gown relationship.

The topic chooser is gone. The card is the primary object, with only Dart/Pat choices and large reveal/new-card controls.

Page 3

Editor's Table after reveal, landscape

The screenshot displays the 'You be the Breeze editor' interface. On the left is a vertical sidebar with navigation links: Memory Rail, START Threshold, HALL Memory Corridor, STRINGS Follow the Strings, DRAWER Open the Drawer, DESK Editor's Table, WALL Reflection Wall, and YEARS Class of... The main content area is titled 'NO-SCORE INTERPRETIVE GAME' and 'You be the Breeze editor'. Below the title is the instruction 'Read the card cold. Was it printed as a Dart or a Pat?'. A card is shown with the text: 'A "don't-lose-your-ability-to-read" dart to the drunk guy who banged on my apartment door at 2 a.m. From a senior girl who did not appreciate having to explain to you that, really, you don't live here.' To the right of the card are two buttons: 'Dart' (highlighted in purple) and 'Pat'. Below the card is a purple button labeled 'Reveal how The Breeze printed it' and a white button labeled 'New card'. Underneath, a section titled 'DART · Jan 16, 2007' states: 'You read it the way The Breeze printed it. The archive tagged this card as Dart on Jan 16, 2007. Its main theme is Housing, landlords & apartment life.' It includes tags: 'Housing, landlords & apartment life' and 'Neighbors, parties & student behavior', and an 'Open this card' button. At the bottom, two sections are visible: 'Same topic' and 'Same year: 2007'. The 'Same topic' section shows three cards related to 'Housing, landlords & apartment life'. The 'Same year: 2007' section shows five cards with various themes including 'Neighbors, parties & student behavior', 'Transit, buses & mobility', and 'Streets, traffic & pedestrian safety'.

Reveal state shows original classification, original text, date, topic tags, and related cards without score language.

Streets, traffic & pedestrian safety

Excuse me, but last I checked, pedestrians had the right of way, Harrisonburg rush hour or not. Most of the time, actually crossing Main Street to get to Anthony-Seeger means finally getting so fed up with the rude, speeding drivers that seem to infest our roadways that we just jump in front of them, risking life and limb to combat their complete ignorance of Driver's Ed. 101. After all, what's a lost leg when you're already late for your ethics exam? Sent in by a mass communication major with no patience and very close to no legs. But campus police are doing something to keep our legs attached - for more, see page 3.
